Report Overview: This publication on the Status of Women in Dickson County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

DICKSON

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percent of women in managerial or professional occupations.

- ◇ Dickson County women have median annual earnings of \$23,686 annually; their male counterparts have a median annual earnings of \$32,252.
- ◇ The female unemployment rate in Dickson County is 0.3% higher than the unemployment rate for all county residents.
- ◇ Only 23.0% of employed county residents hold managerial or professional positions, and 29.6% of working women in the county are employed in managerial or professional occupations.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ 72.7% of women in the county have a high school diploma or equivalency while 72.6% of all residents have their high school degree. Dickson County places emphasis on education, supporting their own initiatives like Education Edge.
- ◇ Dickson County falls into the bottom half of counties in two categories: female high school dropout rate (14.7%) and adolescent pregnancy rate (33.4 per 1,000 girls).
- ◇ 18.4% of women in the county have a four-year degree or better, placing Dickson tenth among counties. Just 11.3% of all Dickson County residents have a four-year college degree while 19.6% of all Tennesseans have such a degree.
- ◇ 26.7% of businesses in Dickson County are owned by women; however, women-owned businesses account for only about 2 percent of the sales and receipts of private firms in the county.
- ◇ Twelve percent of women in the county earn below poverty level incomes.
- ◇ Though 8.1% of all families in the county are in poverty, 26.2% of families with a female householder and no husband present are living in poverty.
- ◇ Of eligible county voters 51.9% are women. Almost half of elected county officials are women.

ABOUT THE COUNCIL AND THIS REPORT

Dickson County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
